A: Boston,USA

Dear Recruiter,

I am writing in order to submit my resume for the position of Data Analytics. I am a data scientist, machine learning engineer, and Frontend Developer in Boston USA. I like to share my knowledge and codes with frontend software development, programming, data science, machine learning, and AI on Kaggle and GitHub, where I write continuously frontend and backend, machine learning, and deep learning codes. I have been ranked one of the highest among more than 305 000 machine learning practitioners at kaggle.com which is the most prominent machine learning platform in the world.

My programming knowledge covers both Frontend Development with React via HTML, CSS, JavaScript, and backend development via Python, and it is also equipped with data science, statistics, machine learning, and AI knowledge. I learn very fast and efficiently anything I want to learn and I am also a very hardworking person who can work independently and also can collaborate very well with other people.

I am proficient in frontend software development languages and technologies such as JavaScript, CSS, SASS, and HTML with efficient practical experience using Angular Framework. I have practical experience and knowledge in backend development in Python. I am also fluent in supportive technologies for software development such as Docker, GIT, Github, JIRA, SQL, and NoSQL databases like PostgreSQL and MySQL.

Sincerely,

Turgut Guvenc
